

1047

The combination lock 1047 is part of the **10 Series** by Serrature Meroni: a wide range of combination locks that cover all applications, functions, and are **suitable for wooden, metal, glass furniture**.

The lock 1047 is the ideal solution for the installation on **metal doors of cabinets and lockers** and it is available with **body and ergonomic rotating handle in plastic** (Standard line). The lock is provided with maintenance key for **secret code recovery**. The 10 Series locks are available lock in **multi-user or single-user** options.

combilocks

APPLICATION AND FUNCTION

1047 is a lock suitable for the installation on **metal lockers and on metal swing doors cabinets**. It is the ideal solution for places where a easy to use and smart closure system is fundamental. It is a keyless lock and can be opened thanks to a 4 digits pre-set secret code.

MATERIAL AND DESIGN

Compact shape and versatility are the main features of 1047 combination lock. The rotating, wide and ergonomic handle is made of plastic as the frontal cover and the open/close indicator.

FINISHES

Available in standard black and white finishes.

MAINTENANCE KEY

The lock kit includes a simple system for the **secret code recovery** with a maintenance key (or special plastic stick tool in the “private mode”).

MULTI-USER AND SINGLE-USER FUNCTIONS

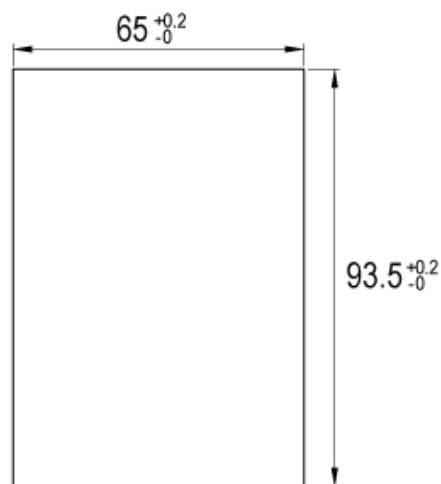

The 1047 combination lock can be set to work both in public mode and private mode depending on the type of application. The **“public mode”** is the solution for multi-user environments (i.e. gyms or public places) while the **“personal mode”** is suitable for single-user furniture (i.e. drawers in offices or in private places)

STANDARD LINE

The combination lock is available in Standard line (plastic cover and rotating handle).

HOLE TEMPLATE

The holing dimensions are 65mm - 93.5mm.

PERSONAL AND PUBLIC

The combination lock can be set to work both in public mode and private mode depending on the type of application. The "public mode" is the solution for multi-user environments while the "personal mode" is suitable for single-user furniture (i.e. personal cabinet or locker).
